

Node

Product Description:

The Node is our top tube bag which can either be attached to the top tube close to the headset at the front, or attached to the seat-post towards the rear. One velcro strap attaches the bag to the top tube whilst another strap (with three height positions) is used to fix the bag to the headset or the seat-post. Thanks to the non-slip fabric on the bottom of the bag, the Node is particularly stable and does not suffer annoying, lateral movement whilst pedalling.

A central zip ensures that the bag can be opened one-handed, important for when you need items "on the go".

The interior is slightly padded so as to ensure a certain thermal insulation. Two outer side mesh pockets are ideal for small items, energy bars or even energy bar wrappers.

Technical Specifications:

- available in two colours: grey or Speckled black;
- Black reinforced nylon fabric speckled 420/300 polyester with polyurethane resin;
- nylon plastic accessories;
- Zip Riri model "Aquazip" M6;
- All Miss Grape products are exclusively Made in Italy, and are certified according to REACH regulations (CE) no. 1097/2006.

Dimensions:

- length: 25 cm
- width: 7 cm
- height: 12 cm
- Weight: 125 g.

Suggested Use:

Node is designed to hold all the small, easily accessible objects that need to be "close at hand" whilst riding. Items such as energy bars, smartphone, power bank, wallet, camera etc.
